Piloting ten innovative solutions for an inclusive European Green Deal

EU-funded research project ACCTING produces knowledge and innovations to advance behavioural change at individual, group, and societal levels, for an inclusive and equal European Green Deal. Concluding its first research cycle, ACCTING has delivered several ‘solution’ outputs, leading to the funding of ten innovative pilot projects.

The ten innovative pilot projects funded by ACCTING aim to reduce or prevent inequalities and negative impacts on poorer, marginalised and vulnerable groups, to ensure a Green Deal where no one is left behind. Another goal is to highlight the potential impact and replicability of smaller-scale solutions driven by local or national civil society organisations based in Europe.

Out of 135 eligible applications, ACCTING selected ten pilot projects addressing vulnerabilities in the areas of the European Green Deal: Energy, Mobility, Food, Disaster Management, and Biodiversity:

- [Dialogue & Action Against Wildfires: Empowering communities for disaster resilience \(Dock, Greece\)](#)
- [Echoversity: a participatory biodiversity conservation project \(Ecomuseum Zagori, Greece\)](#)
- [InclusivECs awards: encouraging the inclusion of vulnerable groups in energy communities \(La Corriente, Spain\)](#)
- [Supporting Roma micro-entrepreneurs towards better environmental sustainability \(Institute of Romani Culture in Albania\)](#)
- [Mapko: connecting community gardens in the Czech Republic \(Kokoza\)](#)
- [Food4Schools: A toolkit to inspire healthy and sustainable food initiatives in schools \(Mamagea, Greece\)](#)
- [Edu Move: Boosting bike use in suburban Tirana \(Active Mobility, Albania\)](#)

- [Todas en bici: Connecting cycling activism with social justice struggles \(aquí, Spain\)](#)
- [Get involved!: supporting green initiatives \(Young Researchers of Serbia\)](#)
- [School goes green: volunteering opportunities for school students \(Per Esemplio Onlus, Italy\)](#)

The pilot projects will have a duration of up to 12 months. More information on the projects and the organisations leading them is available on the [ACCTING project website](#).
